PROFESSIONAL SUMMARY

Technical Analyst, aspiring Data Analyst with a B.S. in Computer Science and hands-on experience using **Python, SQL, Excel, Snowflake, and Tableau** to clean, prepare, manipulate large-scale datasets for thorough insight analysis and dynamic visualization leading to profitable, actionable decision-making. Currently resolving technical issues for dozens of users everyday applying the same analytical concepts to drive efficient success throughout the Commonwealth of Massachusetts.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, API integration, Flask, FastAPI, Git, AWS), SQL (Window Functions, CTEs, Joins, SQLite, SQLAlchemy, PostgreSQL, Data Cleaning & Sanitation), C++ (Advanced), Java (Advanced), R (Intermediate), JavaScript (Full-Stack Development, Dynamic Design), HTML/CSS (advanced), Database Integration (Relational Databases, MongoDB, Supabase, Firebase), Excel (Pivot Tables, EDA analysis), Snowflake, Tableau, Microsoft Office/Suite

Certifications:

- In Progress: DP-600 Fabric Analytics Engineer Associate | Microsoft | 2026 - [View Credentials](#)
- Data Analytics Certification | Google | 2026 - [View Credentials](#)
- Cybersecurity Certification | University of Vermont | 2023 - [View Credentials](#)

PROFESSIONAL EXPERIENCE

Commonwealth of Massachusetts – Technical Analyst

Sept 2024 - Present

- Resolve 150+ hardware, software, VPN, and network issues weekly across Windows/Mac/Linux environments, maintaining a 90% first-contact resolution rate using CLI diagnostics and Bomgar remote tools.
- Maintain user accounts and access controls within a 250,000+ user statewide environment, resolving account access, permissions, and device policy issues for 135+ users weekly via Azure AD and Microsoft Intune while enforcing security/compliance standards.

Blueprint LLC – AI Software Engineer

June 2023 - December 2023

- Built a multi-stage Python/SQL pipeline using LLM prompt engineering and API integrations to auto-generate reports from audio recordings, saving 50+ hours per workshop across 12+ international workshops (300+ total hours saved).

TECHNICAL PROJECTS

Educational Resource Analysis | Python, SQL, Snowflake, Tableau | [GitHub Repo](#)

July 2026 - Present

- Building an ETL pipeline (Snowflake, Python/Pandas, Excel) consolidating 7 Massachusetts DESE datasets covering 395+ districts, using CTE-structured SQL cleaning scripts to standardize 6K+ records.
- Built a multi-stage Snowflake cleaning pipeline (staging → CTAS/CTE deduplication → type-casting → null handling) using TRY_TO_DECIMAL and QUALIFY, exporting standardized outputs to Python/Pandas for EDA.

Bellabeat Case Study | SQL, Excel, BigQuery

January 2026 - February 2026

- Analyzed 8K+ rows of smart-device usage data (Excel, SQL, BigQuery) to identify user engagement patterns, delivering 3 data-driven marketing recommendations to stakeholders.

University Navigation iPhone App “UVMaps” | SwiftUI, Firebase, iOS | [GitHub Repo](#)

December 2022

- Led development of an iOS navigation app (SwiftUI, MapKit, Firebase) to guide users across university campus in real time; won 1st place among 50+ students and 12+ projects at the University Computer Science Fair.

EDUCATION

University of Vermont

August 2019 - May 2023

Bachelor of Science in Computer Science | GPA: 3.6

Relevant Coursework: Algorithm Design & Analysis, Discrete Structures, Software Engineering, Data Structures & Algorithms, Computer Organization, Java Programming, C++ Programming, Python Programming (Gold), Web Site Development, Cybersecurity Law & Policy, Mobile App Development, Cybersecurity Principles, Applied Statistical Probability.
